Brown County PACEs Initiative

Helping Brown County Thrive

The goals of the PACEs Initiative include:

- Raising community awareness of why Positive and Adverse Childhood Experiences (PACEs) have such a significant impact on people's lives
- Teaching us what we can do to dramatically improve the health and resilience of this and future generations
- Providing direct support at no cost to children and families that have experienced adversity
- Providing direct support at no cost to adults who are at risk of incarceration, are incarcerated, or have been incarcerated
- Improving collaboration within the various systems that intersect to serve and support the people of Brown County

If you are interested in scheduling or attending a workshop, would like to engage with free services available, or have other interest in involvement with the Brown County PACEs Initiative, please call the Brown County Centerstone office at (812) 988-2258 or email amanda.kinnaired@centerstone.org and we will direct you to the individual who can best meet your needs.

The PACEs Initiative is made possible by a Department of Mental Health and Addiction (DMHA) Community Catalyst Grant developed through the Brown County Recovery and Wellness Coalition (BCRAWC) and awarded to Centerstone.

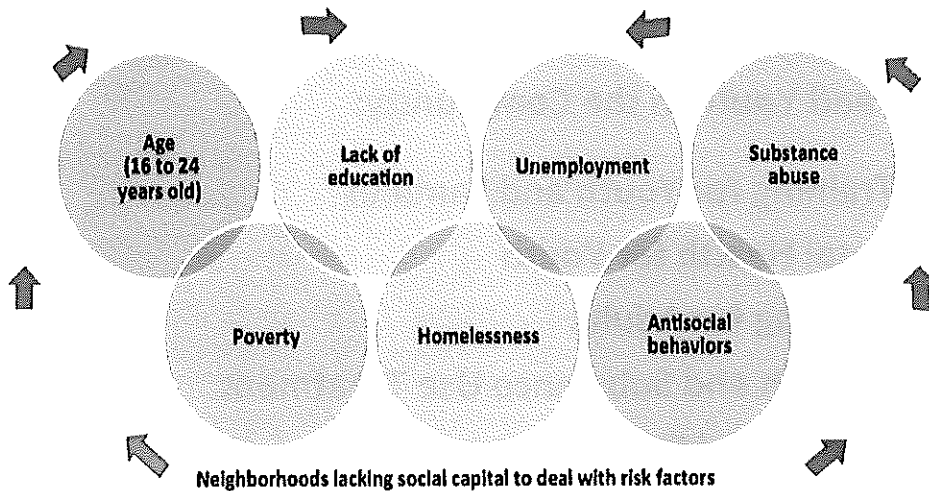

About Centerstone

Centerstone is a nonprofit health system providing mental health and substance use disorder treatments. Services are available nationally through the operation of outpatient clinics, residential programs, the use of telehealth and an inpatient hospital. Centerstone also features specialized programs for the military community, therapeutic foster care, children's services and employee assistance programs. Centerstone's Research Institute provides guidance through research and technology, leveraging the best practices for use in all our communities. Centerstone's Foundation secures philanthropic resources to support the work and mission of delivering care that changes people's lives.

- **Individualized Re-entry Planning**

Spotlight on Success:

Family Support Specialists provided intervention and planning for a 6yr old who had been suspended from Kindergarten class multiple times. Through collaboration with family and school staff, this student is now thriving in a new class placement. The parent shared this success story within their Recovery Group, which reiterates the power of the PACES initiative partners and services to break the cycle of inter-generational trauma and promote individual and community resiliency.
