

MEMO

To: Katelyn Shafer, Manager, Reedy Financial Group P.C.
From: Todd Trinkle, Project Manager, Lochmueller Group
Date: March 30, 2023
Subject: Helmsburg Regional Sewer District SRF Grant Eligibility Census Tract Data

This memo is intended to summarize the census tract information as it relates to the Helmsburg Regional Sewer District (HRSD) Wastewater Treatment Plant (WWTP) Sewer Extension and WWTP Improvements Project which will be funded through the State Revolving Loan Fund (SRF) utilizing Bipartisan Infrastructure Law (BIL) funds.

WWTP Upgrade Project - The recommended alternative for the Helmsburg RSD Sewer Extension and WWTP Improvements Project include a complete sewer extension and construction of a new AeroMod Extended Aeration WWTP. The project also contains complete sewer extension. The complete sewer extension consists of extensions going north and south. There will be ten (10) new connections total, spread throughout each direction of extension. The new WWTP will continue to discharge to Beanblossom Creek.

Summary - This project physically touches areas within Census Tracts 9747 and 9748. It is our belief that the work in the HRSD benefits and directly impacts the wastewater system. Figure 1-2 attached to this letter show the extents of the work. Below is a summary of the Census Tract information with the average MHI calculated. The area where the project is physically located is above the \$46,600 Indiana MHI.

Total Project Physically Within	
Census Tract	MHI
9747	\$62,584
9748	\$69,688
Average	\$66,136
